

WATER LEVEL TRANSDUCER

Measures the height of liquid which can be used to give real time readings of water level in tanks/ dams

WATER LEVEL TRANSDUCER

The water level transducer suitable for liquid level and depth measurement.

APPLICATION

- Irrigation equipment
- Sea water level measurement and control
- Deep well and groundwater monitoring
- Vessel and storage monitor systems
- Control of lift and pumping stations
- Surface water monitoring
- Dewatering

SPECIFICATIONS

- GE pressure cell, 0.25% F.S
- 316L body construction shock and erosion
- Lightning and surge protection
- Accuracy: +/- 0.5%
- Range: 0-3m, 0-5m
- Working Temperature: -40°C - 80°C [non- corrosive medium]
- Output: 4-20mA
- Power Supply: 12-30V DC

ELECTRICAL CONNECTIONS

Current(4-20mA P/L+T)	Red	U+
	Green	Iout(U-)
	Yellow	⏏ Connect to earth ground
	Blue	T
